Learner Profile Report

19 learners • Chinar Quantum AI Learners

S Student 1

🎓 B.Com (2015)

#1

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner says the program offers excellent hope for non-tech business professionals seeking a pivot.

🎯 Goals & Aspirations

- Transition to AI and Data Science for sustainable financial stability

💼 Current Status & Background

- Running a steel/iron business facing market and GST uncertainty
- B.Com graduate
- Lacks foundational technical skills

📊 Key Insights for Organization

- Highly motivated to change career
- Business experience provides real-world perspective
- Shows strong commitment to upskilling
- Potential to act as a success case for non-tech pivots

🛠️ Improvement Areas & Support Needed

- Needs 8th-10th grade mathematics foundation
- Requires basic programming structure training
- Benefits from flexible, well-paced learning schedule

S

Student 2

🎓 Science (Non-Medical)

#2

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner reports connection with the Growth & Expansion Unit to embed AI frameworks into school curricula.

🎯 Goals & Aspirations

- Deep dive into Machine Learning and AI to create societal tech solutions
- Translate textbook theory into practical technical development and hardware integration

💼 Current Status & Background

- Science Teacher at a private school, teaching up to 10th standard
- Science background (non-medical)

📊 Key Insights for Organization

- Demonstrates strong commitment to applying AI in education
- Possesses teaching expertise that can pilot AI curricula
- Proactively engaged with Growth & Expansion Unit
- Motivated to bridge theory and hardware implementation

🛠️ Improvement Areas & Support Needed

- Needs structured guidance linking hardware/electronics circuits with AI software models
- Requires mentor support to launch micro-project deployments in his school

S

Student 3

🎓 11th-12th Standard, Non-Medical Science

#3

💬 ORGANIZATION FEEDBACK / ALIGNMENT

Mentors advised strict adherence to a continuous learning pathway and structured behavioral grooming.

🎯 Goals & Aspirations

- Become an AI Engineer
- Contribute to Data Science projects

💼 Current Status & Background

- Student
- Completed 11th/12th Standard in Non-Medical Science
- Basic Python knowledge

📊 Key Insights for Organization

- Demonstrates foundational Python skills
- Shows strong aspiration toward AI and data science
- Responsive to mentor guidance on structured learning
- Potential for high engagement if confidence barriers are addressed

🛠️ Improvement Areas & Support Needed

- Overcome deep shyness and activate camera during live sessions
- Maintain session continuity and avoid skipping sequential modules
- Improve confidence in applying Python concepts
- Require closer progress tracking

Student 4

🎓 9th Standard Student

#4

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner described the program as terrific.

🎯 Goals & Aspirations

- Pursue data science
- Pursue analytics
- Engage in AI research
- Participate in hackathons and internships

💼 Current Status & Background

- Student (9th standard) at a school
- Strong logical and mathematical abilities
- Skilled at chess and structural problem solving

📊 Key Insights for Organization

- Demonstrates strong logical and quantitative reasoning
- Highly motivated by hackathons and internship opportunities
- Shows early potential for tech internships
- Expresses positive enthusiasm for the program

🛠️ Improvement Areas & Support Needed

- Public speaking shyness
- Prefers text communication over speaking
- Poor time management
- Needs soft-skills training

S

Student 5

🎓 B.Tech Electronics & Communication (2nd Semester)

#5

💬 ORGANIZATION FEEDBACK / ALIGNMENT

He actively uses the program curriculum to supplement his university engineering studies.

🎯 Goals & Aspirations

- Become a technology inventor focusing on AI and advanced Data Science applications

💼 Current Status & Background

- Student pursuing B.Tech Electronics & Communication (2nd semester)
- Strong foundation in Python and databases
- Technical readiness praised
- Learning Arabic and quantum concepts

📊 Key Insights for Organization

- Strong Python/database foundation
- Applies curriculum directly to degree coursework
- Demonstrates high technical readiness
- Shows motivation by multitasking advanced topics

🛠️ Improvement Areas & Support Needed

- Needs to reduce conversational hesitation for vivas, presentations, and technical interviews
- Develop clearer spoken communication skills

S Student 6

🎓 Undergraduate 2nd Year Zoology, Computer Diploma

#6

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner reported mentors suggested exploring domain-specific AI tools for zoology.

🎯 Goals & Aspirations

- Become a zoology teacher
- Integrate AI models into zoology education

💼 Current Status & Background

- Student (2nd year Zoology)
- Part-time home tutor
- Skilled in stenography and typing
- No core programming background

📊 Key Insights for Organization

- Practical side-skills in stenography and typing
- Strong motivation to apply AI in biology
- Proactively seeks domain-specific AI resources
- Willing to engage via recorded sessions

🛠️ Improvement Areas & Support Needed

- Lacks foundational programming knowledge
- Highly congested daily schedule limits live interaction
- Timing clashes require reliance on recorded lectures
- Needs dedicated asynchronous doubt-clearing support

S

Student 7

🎓 7th Standard Student

#7

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner noted that the organization is planning a customized, friendly psychological intervention to ensure he does not feel left behind.

🎯 Goals & Aspirations

- Futuristic technology
- Foundational coding
- Website development
- Visual arts

💼 Current Status & Background

- Student (7th standard)
- Creative with strong arts/painting background

📊 Key Insights for Organization

- Highly creative with strong arts background
- Shows keen interest in futuristic tech and coding
- Motivated to develop website and visual arts skills
- Potential for high engagement with personalized support

🛠️ Improvement Areas & Support Needed

- Limited attention span due to young age
- Hesitation to communicate or ask questions in larger groups
- Needs balanced screen time with outdoor activities for socialization

Student 8

S

🎓 7th Standard Student

#8

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner requests psychological comfort sessions to encourage mic unmuting and peer interaction.

🎯 Goals & Aspirations

- Train custom AI models
- Develop knowledge in financial markets and stock trading

💼 Current Status & Background

- Student in 7th standard
- Passive during discussions
- Limited mathematical abstraction skills

📊 Key Insights for Organization

- Demonstrates early interest in AI and finance
- Shows willingness to engage with targeted support
- Potential to benefit from peer micro-groups
- Highly motivated despite current passivity

🛠️ Improvement Areas & Support Needed

- Difficulty with abstract algebra concepts
- Needs visual math explanations
- Requires psychological comfort to speak up
- Benefits from structured peer micro-group interactions

S

Student 9

🎓 Integrated MBA

#9

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner noted that the organization aligned her with domain experts, providing a clear corporate pathway.

🎯 Goals & Aspirations

- Specialize in AI-driven modern marketing frameworks and data analytics.

💼 Current Status & Background

- Management student
- Strong business concept knowledge
- Science school background

📊 Key Insights for Organization

- Demonstrates strong grasp of business concepts
- Shows commitment to advancing AI-driven marketing skills
- Engages proactively with domain experts
- Potential to contribute strategic insights in marketing analytics

🛠️ Improvement Areas & Support Needed

- Overcome coding anxiety when using intensive tools
- Manage mental fatigue during technical onboarding
- Require step-by-step modular training for new tools

S

Student 10

🎓 BCA (Distance) student, former medical aspirant

#10

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner reported that mentors advised shifting to a regular on-campus university for post-graduation to address behavioral and networking gaps.

🎯 Goals & Aspirations

- Excel in machine-learning deployment
- Train custom machine-learning models
- Pursue a regular master's degree

💼 Current Status & Background

- Student pursuing BCA via distance mode, previously aimed for medical stream
- Limited classroom exposure, seeking practical experience

📊 Key Insights for Organization

- Highly motivated to master advanced machine-learning techniques
- Responsive to mentor guidance and willing to adapt
- Proactively enrolled in the upcoming DAP data-analytics cycle
- Diverse academic background may enrich peer discussions

🛠️ Improvement Areas & Support Needed

- Needs foundational mathematics for advanced machine learning
- Requires professional behavioral polishing
- Would benefit from on-campus peer networking opportunities
- Needs a bridging module in statistical mathematics

S Student 11

#11

🎯 Goals & Aspirations

- Technical career in AI

📊 Key Insights for Organization

- Demonstrates interest in AI technical roles
- Shows low engagement during evaluations
- Requires proactive outreach to maintain participation
- Responsive to explicit instructions

🛠️ Improvement Areas & Support Needed

- Activate camera during attendance
- Use Discord actively for communication
- Increase participation in evaluation sessions
- Engage proactively with support team

S

Student 12

🎓 Strong Mathematics and Core Analytics background

#12

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner expressed deep gratitude for the organization’s post-course handholding and career placement framework.

🎯 Goals & Aspirations

- Strategic career pivot into advanced Data Analytics and corporate automation engineering

💼 Current Status & Background

- Human Resources professional in corporate management operations with strong mathematics and core analytics background

📊 Key Insights for Organization

- Mature corporate profile demonstrates reliability
- Highly values automation tools, indicating strong engagement
- Appreciates hands-on support, suggesting commitment to program
- Seen as high-potential for fast-tracked enterprise roles

🛠️ Improvement Areas & Support Needed

- Needs to adapt corporate workflows into automated Python/Data-science frameworks seamlessly

Student 13

🎓 Medical aspirant track

#13

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner appreciates the basic course setup for eliminating tech phobia and bridging initial technology gaps.

🎯 Goals & Aspirations

- Balance medical analytics domain tracking with foundational AI literacy.

💼 Current Status & Background

- Student with medical aspirant background; seeking AI literacy.

📊 Key Insights for Organization

- Strong commitment to bridging technology gaps
- Engaged in foundational AI learning
- Potential to apply AI in medical analytics
- Values structured scheduling support

🛠️ Improvement Areas & Support Needed

- Develop time-management to balance exam preparation and tech learning
- Require structured scheduling guidance
- Improve integration of tech skills with exam timeline

Student 14

🎓 Tech Enthusiast/Learner Track

#14

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner expressed extreme satisfaction with instructional delivery and said, “I love this,” during mentorship sessions.

🎯 Goals & Aspirations

- Bridge into active Data Science tracks
- Engage in student community initiatives

💼 Current Status & Background

- Student
- Career tracker
- Tech enthusiast

📊 Key Insights for Organization

- Highly interactive and community-minded
- Values peer-to-peer structural networks
- Shows strong commitment to the program
- Potential to lead student engagement activities

🛠️ Improvement Areas & Support Needed

- Needs a structured data engineering roadmap
- Support transitioning from basic user to professional coder

S Student 15

#15

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner indicated that an automated alert or personal check-in from learner support would help assess program satisfaction.

🎯 Goals & Aspirations

- Upskill in basic machine learning deployment frameworks

📊 Key Insights for Organization

- Shows interest in acquiring machine-learning deployment skills.
- Current low interactive footprint suggests room for increased engagement.
- Open to automated support, indicating responsiveness to structured communication.
- Potential to benefit from milestone tracking tools for progress visibility.

🛠️ Improvement Areas & Support Needed

- Increase structural feedback engagement and submission ratios.
- Enhance interactive participation during program activities.
- Map learner to primary batch dashboard for milestone tracking.

Student 16

S

🎓 Foundational student track

#16

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner noted that onboarding verification on Discord is required to clear initial system communication blocks.

🎯 Goals & Aspirations

- Analytical logic tracks
- Early technical certification programs

💼 Current Status & Background

- Student
- Enrolled in core tech tracking
- Foundational student track

📊 Key Insights for Organization

- Demonstrates strong commitment to technical skill development
- Identifies onboarding gaps, indicating attention to process improvement
- Willing to schedule 1-on-1 mentor sessions
- Engaged in tracking verification procedures

🛠️ Improvement Areas & Support Needed

- Needs to proactively schedule 1-on-1 slots with technical mentors
- Requires Discord onboarding verification to remove communication blocks
- Missed deep personal evaluation interactions on transcript date

Student 17

🎓 Advanced educational tracking domain

#17

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner noted that they were advised to transition into advanced Python scripting tracks and maintain immediate offline communication loops.

🎯 Goals & Aspirations

- Build a highly competitive corporate portfolio through structured project work
- Secure an early internship placement

💼 Current Status & Background

- Student
- Potential intern candidate
- Background in advanced educational tracking domain
- Excellent baseline capacity for analytics

📊 Key Insights for Organization

- Excellent baseline analytics capacity
- Highly responsive to mentorship advice
- Strong potential for corporate project contributions
- Motivated to develop a competitive portfolio

🛠️ Improvement Areas & Support Needed

- Inconsistent live meeting attendance
- Low camera utilization during sessions
- Needs firm deadlines to maximize project output

S

Student 18

🎓 Technical/Applied Sciences Track

#18

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner is extremely satisfied with personalized curriculum access and is committed to resolving platform blocks with IT support.

🎯 Goals & Aspirations

- Implement analytical pipelines in modern MLOps

💼 Current Status & Background

- Student
- Early-career professional
- Technical/Applied Sciences background

📊 Key Insights for Organization

- Highly motivated to build real-world project portfolios under mentorship
- Shows strong satisfaction with personalized curriculum
- Demonstrates commitment to solving platform issues
- Willing to increase verbal participation in live sessions

🛠️ Improvement Areas & Support Needed

- Needs clear, documented steps for platform configuration
- Faces regional network onboarding barriers
- Requires support to navigate onboarding processes

S

Student 19

🎓 Pharmaceutical / Applied Sciences Track

#19

💬 ORGANIZATION FEEDBACK / ALIGNMENT

The learner finds the program aligned with advanced analytical modules but needs cross-domain research literature from the organization.

🎯 Goals & Aspirations

- Merge advanced machine learning frameworks with pharmaceutical innovation and drug discovery systems

💼 Current Status & Background

- Student
- Emerging entrepreneur
- Background in pharmaceutical and applied sciences

📊 Key Insights for Organization

- Innovative visionary mindset
- Focus on long-term societal and medical impact of AI
- Alignment with advanced analytical modules
- Demonstrates commitment despite onboarding challenges

🛠️ Improvement Areas & Support Needed

- Managing scheduling conflicts between academic workload and mentorship hours
- Access to cross-domain research literature
- Resolution of onboarding issues with technical platforms
